Enhanced lead management

With all the information you need in one place, you can focus on spending time with your leads, rather than on managing the heaps of data that come with them.

www.surveymojoint.org

Collect customer satisfaction level in a few seconds

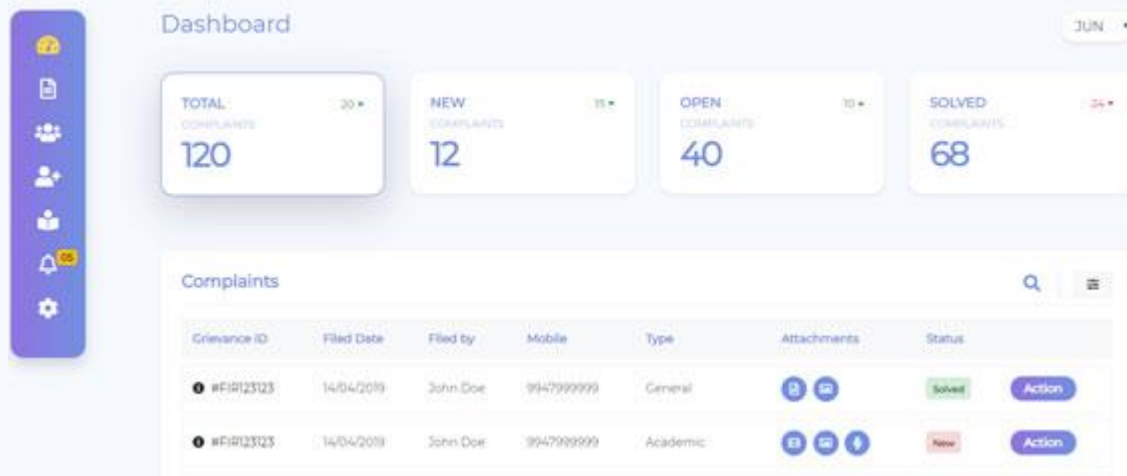

Survey Mojo helps you to create easy but effective surveys with one touch feedback to understand customer satisfaction. Measuring the feedback will help you to identify problems, performers, promoters & take timely action.

The image displays the Survey Mojo interface for a 'RECEPTION' survey. The main form has a title 'RECEPTION' and a progress bar. It contains three sections: 'Service quality' with a green smiley face and 'Excellent' label, 'Waiting time' with a green smiley face and 'Excellent' label, and 'Staff Behaviour' with five smiley faces ranging from green to red. A modal window titled 'RECEPTION' is overlaid on the form, showing a 'Service quality' section with a large green smiley face and 'Excellent' label, and a 'Waiting time' section with a text input field. At the bottom of the modal are 'Submit' and 'Clear' buttons. A yellow circular icon with a refresh symbol is located in the top right corner of the main form.

www.tuneradio.in

The best way to get on air

Tune Radio provides you the platform to have powerful, easy to set-up and user friendly online radio apps.

Tune Radio gives you the extra power to break the limitations of FM broadcasting and reach your listeners beyond geographic borders.

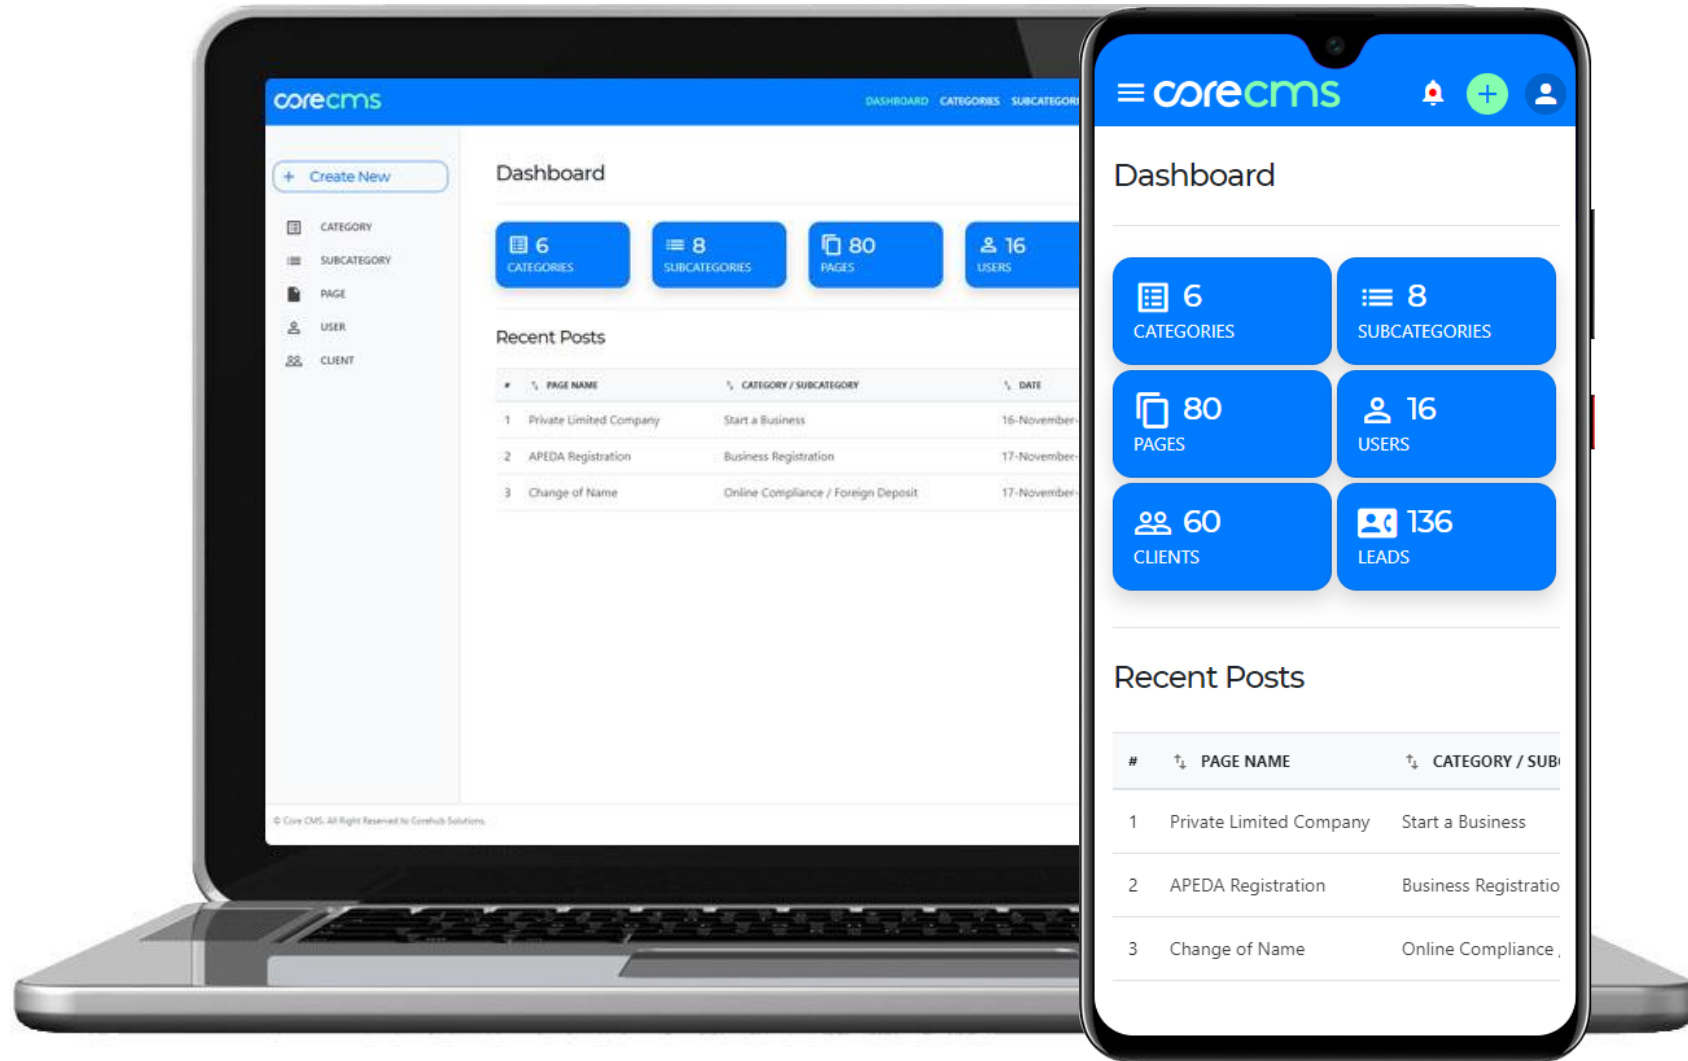

Manage Content of your Websites

CoreCMS allows non-technical people who don't know programming languages to easily create and manage their own web content.

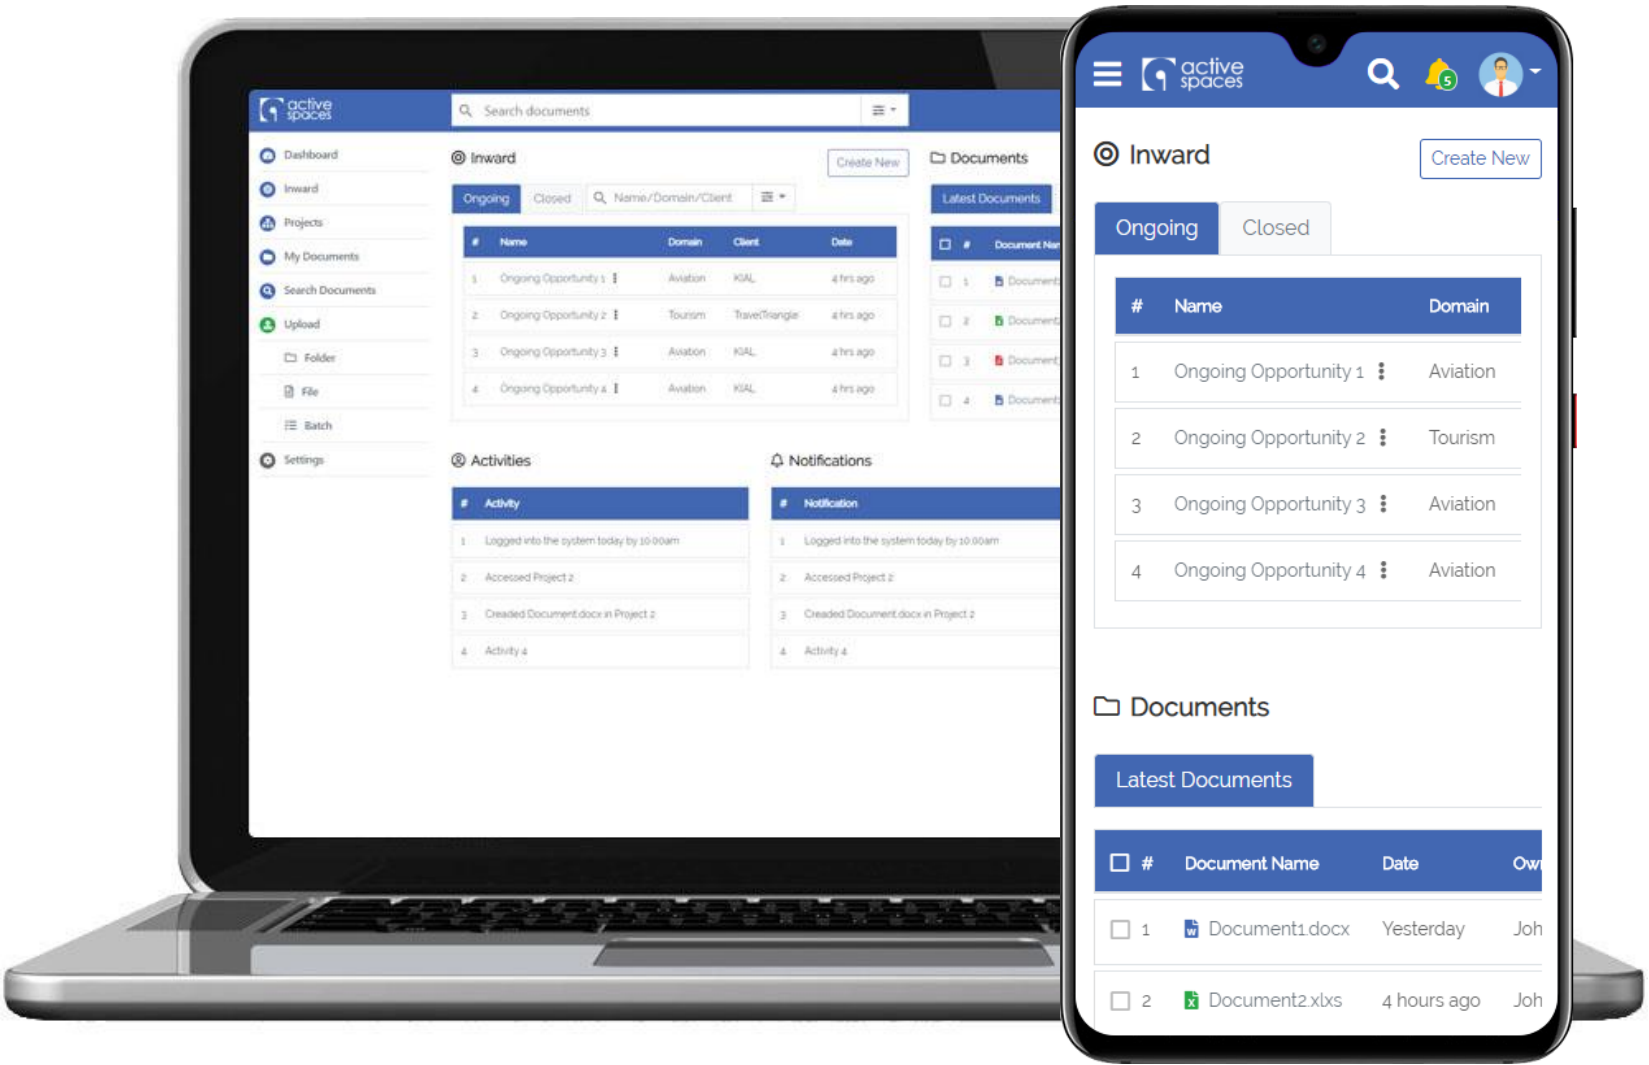

When a company uses CoreCMS to publish its pages, it reduces its reliance on front-end engineers to make changes to the website, making it quicker and easier to publish new content.

corecms

Document management system

Receive, track, manage and store documents and reduce paper. Most are capable of keeping a record of the various versions created and modified by different users.

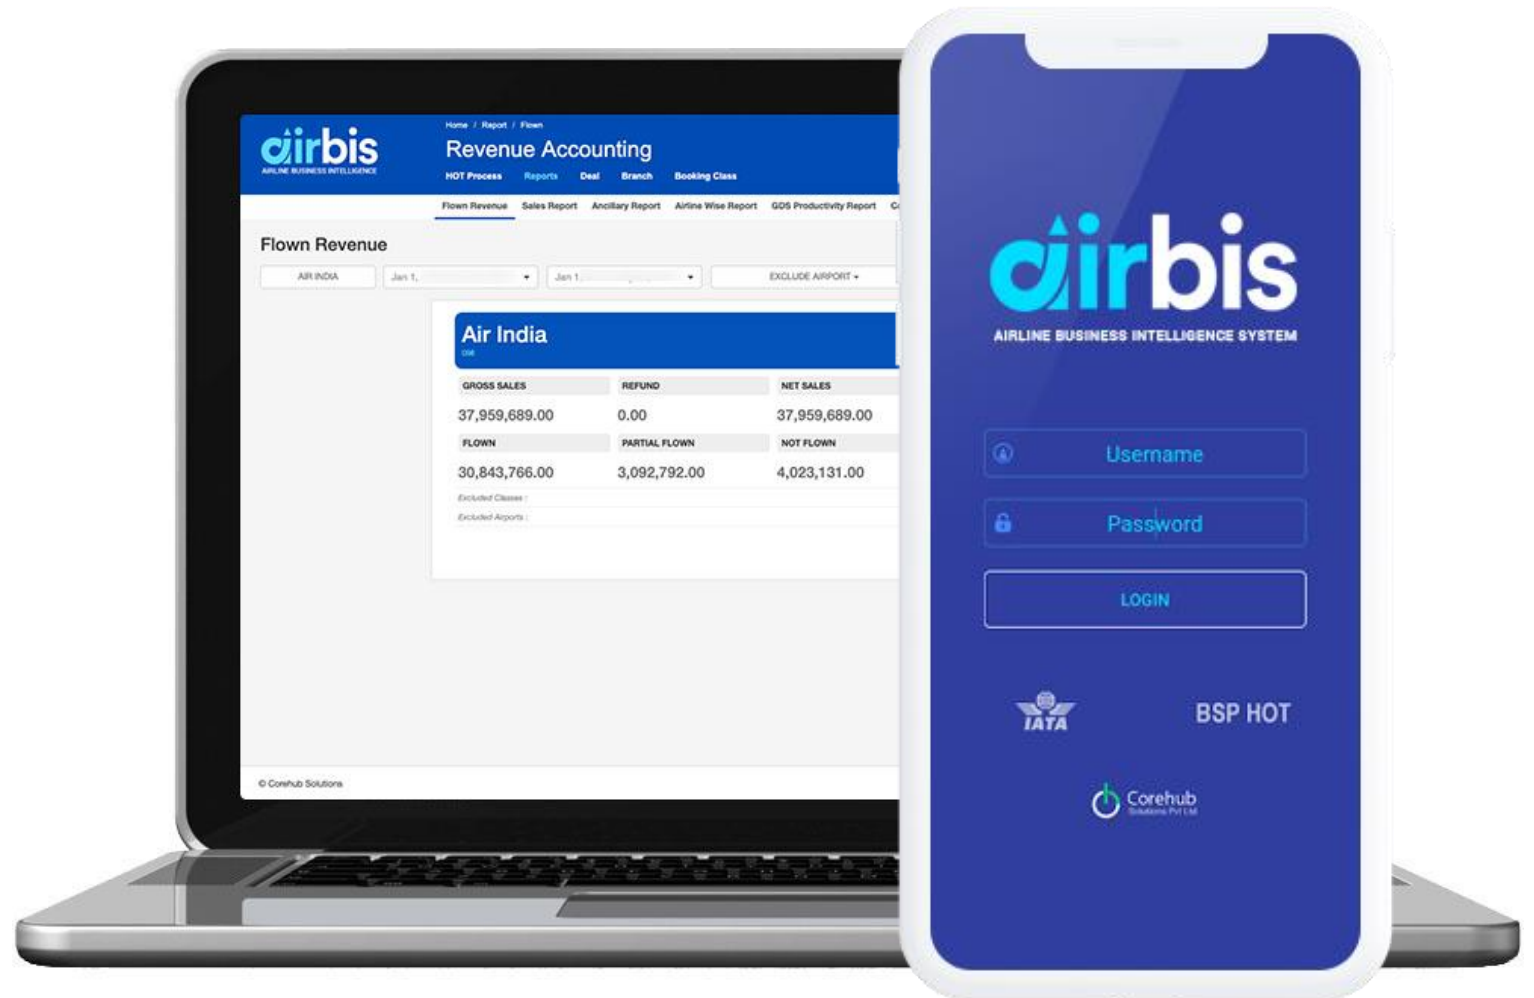

www.airbis.co

Simplifies Airline Auditing

AirBIS is a standardised system for airlines and agents which provides a simplified solution for reconciling their revenue accounts and auditing their sales data. This system is designed primarily around industry needs for the air travel domain.
